PROFILE SUMMARY

A motivated and dedicated Software Developer committed to continuously improving my technical skills. Experienced in both frontend and backend development, with strong analytical and problem-solving abilities. Highly responsible, adaptable, and capable of working effectively under pressure. Eager to learn new technologies, enhance my expertise, and contribute to developing efficient software solutions while creating long-term value for organizations.

WORK EXPERIENCE

Full Stack Developer — AI Automation Document Validation **July 2026**
Silkspan Co., Ltd.

- Developed an end-to-end insurance document processing system to retrieve documents from LINE, classify and extract data, match insurance policies, and automatically transfer documents to the existing DMS.
- Implemented an AI-powered document processing pipeline , using Google Document AI (OCR) for data extraction and Anthropic Claude API for document classification.
- Built a document review console using Next.js 15 and AG Grid, enabling staff to review, approve, and process documents in bulk, with a dashboard for performance monitoring.

Full Stack Developer — RSU Job Fair **Jan 2026 – Feb 2026**
Rangsit University

- Developed a full-stack Job Fair web platform using Next.js (App Router), TypeScript, Prisma ORM, and PostgreSQL, supporting 3 user roles (Candidate, Company, Admin)
- Developed a Company Dashboard covering company profile management, job posting, candidate-job matching system, and application management
- Implemented file upload management via AWS S3 (S3-Compatible Storage) for profile images, company logos, verification documents, and resume PDF
- Containerized the application using Docker for production deployment readiness

Full Stack Developer — Leave Management System **Nov 2025 – Jan 2026**
iRecruit (Thailand) Co., Ltd.

- Developed a full-stack leave management system using Nuxt.js / Vuetify, Node.js (Express), and MySQL, following the Controller-Service pattern
- Developed an HR admin dashboard for organization-wide leave quota management, real-time balance tracking, and modification history logging
- Collaborated with cross-functional development teams, integrating shared APIs and databases to ensure the leave module operates seamlessly within the broader HR platform
